Agency's Mission Statement: Strengthening and supporting individuals and families by promoting cost effective and comprehensive services in connection with our partners that foster independent and healthy families.

Below are the goals, activities, and measures for the agency. Goals, activities, and measures need to be developed by the agency, in consultation with the Governor's Office, and agreed to by the Legislature (Government Operations and Audit Committee).

Goal 1: Ensure access to services for our customers.

mplementation of Prenatal/Primary Care Innovation Grants.	IOVIGE CC	of ellec	iive seivices.					
Avera helps pregnant women in South Dakota diagnosed with gestational diabetes by providing remote blood sugar monitoring, specialized test strips and video visits with a diabetic educator. Goal is to improve access to OB care and treatment of gestational diabetes; reduce the number of c-sections, birth complications, and infant/mother mortality; and increase rates of healthy birth weight pabies and the number of babies who are delivered at full term. Between January - July 2020 Avera supported 49 women.			49	20	-	-	-	49
i. Native Women's Health Care helps patients by linking primary and prenatal services to behavioral health services leveraging a comprehensive care team including primary care, behavioral health, and community health workers. Goal is to improve adherence rates for SUD treatment; increase screening, preventive, and primary/prenatal care; increase the number of qualified behavioral health staff; and increase the number of women who are accessing prenatal services, wellness checks, and behavioral health services. Between January - July 2020 Native Women's Health Care served three women.			3	20	-	-	-	3
ii. Center for Family Medicine provides patients with a birth center/pregnancy health home approach to provide a full array of prenatal and postnatal care. This project will also train family medicine resident physicians in innovative, evidence-based prenatal care models. Goal is to improve screening services for those with increased isk for gestational diabetes and preeclampsia; and decrease rates of prenatal hospitalization and c-section, pre-term delivery, NICU stays, and other complications. Between January - July 2020 Center for Family Medicine has supported 36 women.			36	20	-	-	-	36

Caring for People in the Most Cost Effective Manner. About 6,000 Medicaid recipients with high-cost chronic conditions and risk factors participate in the Health Home program. The goal of the program is to improve health outcomes and avoid high-cost care and includes incentive-based payments to high performing providers. Most recent results show the program has reached our target for participants with a person-centered care plan and is above the target for participants who visited a primary care provider (PCP) in the last six months. The program led to \$8.0 million in net cost avoidance in CY 2019, primarily due to a reduction in avoidable inpatient admissions and emergency department visits.
